

# **Project Manager Clinical Operations Belgium/Luxemburg**

**Currently we have a vacancy for a Project Manager in our Clinical Operations department in Belgium.**

**The Project Manager [PM] will be the primary point of contact for a study or group of studies being performed in Belgium & Luxemburg covering all therapeutic areas.**

## **Challenges**

Under the general supervision of the Clinical Research Manager [CRM] the PM has overall managing, coordinating and organizational responsibility for the activities required at country level (from feasibility until closure of the study) and has a supporting role in site relationship, site management and monitoring activities on a regular basis when needed...

## **Qualifications**

The ideal candidate will be educated to a Bachelor degree in a life-science or equivalent relevant health care experience and have at least 5 years of Clinical Research Experience.

To succeed in this position, skills in project management, negotiating, understanding the different processes (e.g. Drug Development Process) as well as local regulators, leading a team and communication are required.

Fluency in Dutch/French), a good knowledge of English and a good knowledge of MS Office (Word, Excel, and PowerPoint), internet are necessary.

The position is office based and the person will report to the Clinical Research Manager Belgium/Luxemburg.

## **Contact**

If you are interested to take the challenge, please send your motivation letter and CV to Myriam Rampelbergh (MyRa@novonordisk.com), Officer People & Organisation.
